Shoulder Care Packages

Stiff, painful shoulders are a common issue amongst busy urbanites. Although symptoms may initially be minor or imperceptible, they may be an early indication of physical fatigue and could lead to serious consequences if left untreated. Patients should seek medical attention as soon as possible.

Hong Kong Adventist Hospital – Stubbs Road's Shoulder Care Packages are specially designed to provide patients with a wide range of services including diagnosis, treatment, rehabilitation, minimally invasive surgery, and joint replacement surgery. The packages are managed by a team of shoulder expert and medical professionals, who are committed to offering comprehensive care to each patient on his/her journey of recovery.

What is Shoulder Arthroscopy?

Shoulder arthroscopy is a minimally invasive surgery where a tiny camera (an arthroscope) is inserted through a small incision in the skin to examine or repair the tissues inside or around the shoulder joint. Other small surgical instruments may also be used during the procedure to repair the joint or conduct other arthroscopic procedures.*

甚麼是肩關節鏡？

肩關節鏡屬於微創手術，是通過一個小傷口，將連接細小鏡頭的導管（即關節鏡儀器）伸入肩關節，來診斷或治療肩關節損傷。配合其他內視鏡器械，醫生還可以使用肩關節鏡修補關節，或進行其他肩關節手術。*
