2022/01 Revised 修訂

Personal Screening 檢查

Research shows that the earlier breast cancer is detected and diagnosed, the better the outcome. We highly recommend regular breast checks for all women according to age and family history.

研究發現，愈早診斷出乳癌，治療結果愈理想。我們鼓勵所有婦女根據其年齡和家族病史，定期接受乳房檢查。

A	Age 年齡 (years old 歲)			
	20-39	30-39	40-49	≥50
Breast Self Examination 乳房自我檢查	Monthly 每月			
Clinical Breast Examination 乳房臨床觸診	Once every 2 years 每2年	Once a year 每年		
Mammogram +/- Ultrasound 乳房造影 +/- 超聲波掃描	Depends on family history 視乎家族病史	Once a year 每年	Once or twice a year 每年1-2次	

Opening Hours 開放時間

Breast Clinic 乳病外科門診

4 Breast Clinic 乳病外科門診

Breast Cancer is the most common female cancer in Hong Kong, and is the third most common cause of cancer deaths. The number of new cases has tripled in the past twenty years, and it is estimated that one in every 17 women in Hong Kong will develop breast cancer during her lifetime. Reassuringly, most breast-related problems are benign; however, it is imperative that all women have their breast concerns properly assessed by experienced doctors as early detection saves lives.

在香港，乳癌是女性最普遍患上的癌症，它同時是第三位癌病殺手。乳癌新症數字在過去廿年增加兩倍。據估計，每十七名香港婦女中，就有一名在一生中有機會患上乳癌。幸好，大部份乳房問題都是良性的。不過，及早發現有助拯救性命，以審慎起見，所有婦女應該正確地關注她們的乳房，最好是由富經驗的醫生檢查。

Breast Clinic

4 Breast Symptoms 病徵

Changes in the breast such as:

- + Breast lumps#
- + Breast pain
- + Breast skin change and deformity
- + Nipple retraction
- + Nipple discharge

The most common symptom seen in breast cancer
